***Election/Restriction***

Claims 3, 5-8 and 14-18 remain withdrawn.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1, 2, 4, 9, 10, 12, 13, 19-23 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The cap being "in contact with" (claims 1 and 21) and "engaged with" (claim 19) the convexly curving domed shape of the flange is considered new matter. The cap has not been disclosed as contacting or engaging the domed portion of the flange.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 20 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 20 redundant in view of the amendment to claim 19.

### ***Response to Remarks***

In response to applicant's remarks, the examiner generally agrees with applicant that the prior art applied does not show the cap in contact with or engaging the domed portion of the flange. However, as noted above, the contact at the domed portion is new matter since it is neither shown nor described.

The figures show the cap to have a concave shape generally corresponding to the domed shape of the flange to closely receive the flange (paragraph [0026], line 4) and since this feature is not found in the prior art, the claims would be allowable if it were included in the claims as a replacement for the contact and engagement of the dome.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
